Datrend Systems launches vPad-A1™

Datrend Systems Inc. is pleased to announce the launch of their latest product, **vPad-A1™**. Built on Datrends' Vision Pad Platform, vPad-A1 is the only modular Vital Signs Simulator currently on the market.

Comprising of 3 modules, vPad-PS a Multi-Parameter Patient Simulator, vPad-O2 a Pulse Oximeter Tester and vPad-BP a Non-Invasive Blood Pressure Simulator, the modules can be used together, independently, or in various combinations. Integrated user customizable SpO2 R-Curves and NIBP envelopes are a first in our industry.

Ron Evans, President of Datrend Systems stated, "This launch is a major milestone for Datrend as it adds another product to our portfolio that we were previously missing. As with our other products on the vPad Platform, the user has access to enhanced data recording, reporting and integrated automation that will improve throughput, traceability & repeatability. Linking the vPad-A1 to one of our vPad Safety Analyzers will enable users to interface to CMMS systems thereby completely automating and simplifying the Preventative Maintenance & Reporting process".

For more information on this and Datrend's other innovative products visit the company's website www.datrend.com or contact them directly at 604-291-7747

About Datrend Systems Inc.

Datrend Systems Inc. is a Canadian based biomedical engineering company focused on developing and manufacturing state-of-the-art biomedical test instruments and devices for hospitals, clinics and medical equipment manufacturers. Since our launch in 1991, we have expanded to serve global markets with innovative products.
