vPad Rugged 2 Electrical Safety Tester

Automated and manual 120-240V testing with wireless interface to corporate CMMS.

vPad-ES 2

The desktop version of the vPad-Rugged 2, for who users require a high level of automation and CMMS connectivity.

vPad-RF ESU Analyzer

The smallest full featured analyzer for testing Electrosurgical Units (ESUs).

vPad-Mini™

Enables Clinical and Field Service Engineers to quickly perform basic electrical safety checks on all types of medical equipment.

vPad-CO2

End-Tidal Carbon Dioxide (EtCO₂) Breath Simulator. Designed to test capnometers, patient simulators with capnography functionality, and respiratory gas analyzers.

vPad-IN

Infant incubator & radiant warmer testing system.

vPad-IV

Infusion Device Analyzer's simple slide-and-click modular system will allow users to configure each analyzer between 1-6 channels.

venTest

Ventilator & anaesthetic system tester will test high and low flow & multi-gas option.

Phase 3

Defibrillator/Pacer Analyzer tests all available defibrillators, including monophasic, biphasic, and pulse biphasic waveforms.

Oxitest Plus7 SpO₂ Simulator

Pulse Oximeter Tester with Nellcor-Puritan Bennett sensor port.

FMS-3 Fetal Simulator

Compact fetal/maternal simulator.

AMPS-1

Advanced modular patient simulator with the ability to add modules as required.

- Innovative Platform

vPad-A1 All-in-one Vital Signs Simulator

Datrend Systems' vPad-A1, based on our revolutionary Vision-Pad Technology™, is an all-in-one patient simulation system. vPad-A1 is modular and is comprised of a **Multi-Parameter Patient Simulator, SpO₂ test module**, and a **Non-Invasive Blood Pressure simulation module** which may be used together or independently in various combinations, with an Android handheld device or vPad tablet providing the user interface.

vPad-PS Simulator

Multi-Parameter Patient Simulator.

vPad-BP Simulator

NIBP simulator designed to test the accuracy and repeatability of the NIBP function on Patient Monitors.

vPad-O2 SpO₂ Tester

The next generation SpO₂ tester. Compatible with all major industry manufacturers.

M1004 Digital Pressure Calibrator

Choose M1004 when you need a quick pressure check for clean, dry gas measurement.

M2004 Digital Pressure Calibrator

The M2004 is a portable pressure instrument with flexible features to meet many of your everyday pressure measurement needs.

M204 Smart Manometer

Meriam's M204 Smart Manometer brings high precision and value to handheld, medical digital manometer users.

M104 Digital Manometer

Combines form, fit and function to deliver precision pressure measurement for field, plant or lab use.

M134 Thermocouple Calibrator

Delivers precision measurement for temperature calibration, temperature verification and temperature measurement.

MultiVariable Instrument Pack (MVIP)

Customizable Measurement Solution

MGF16BN Digital Pressure Gauge

Designed to handle the demands of pressure measurement.

meriGauge Plus

The perfect solution for multi-range pressure measurements needs.
